# SP202100007 and SP202100008 Jefferson Mill Hydroelectric Project

# Attachment C

**Sec. 5.1.26 - Hydroelectric power generation.**

a. These provisions are intended to encourage the use of water power as a natural and replenishable resource for the generation of electrical power. While serving energy conservation and natural resource goals, these provisions are also intended to limit such use so as: not to be objectionable in the area in which it is located; not to unreasonably interfere with the passage of boats, canoes, fish and other aquatic life; not to unreasonably degrade the riverine and aquatic habitat or water quality, in general;

b. The applicant shall submit with his application for special use permit, plans, profiles, studies and other supporting information addressing the issues in (a) above. No such application shall be approved until comment and recommendation has been received from the State Water Control Board, the Commission of Game and Inland Fisheries, and other appropriate federal, state and local agencies;

c. Whether or not a site development plan is required, the applicant shall submit to the county engineer a certified engineer's report as described in section 4.14.8. In review of such report, the county engineer shall be particularly mindful of the requirements of section 4.14.1, noise, and section 4.14.7, electrical interference;

d. Except as specifically permitted in a particular case, no auxiliary or accessory method of power generation shall be permitted nor shall any pump storage or rechannelization be permitted.
