

FIRST AID/CPR CERTIFIED PERSONNEL

~~In each school, procedures for the handling of emergencies due to sudden illness or injury to students or employees shall be established and made known to the staff. Each school and school vehicle shall be equipped with appropriate first aid equipment. Further medical attention to students is the responsibility of the parents or guardian, or of someone the parents or guardian designate in case of emergency.~~

~~Each principal shall ensure that staff knowledgeable in safety procedures is available. In any school building with an instructional and administrative staff of ten or more, there shall be at least two instructional or administrative employees who have received training in emergency first aid and cardiopulmonary resuscitation (CPR) within the last two years or who have current CPR certification. In any school building with an instructional and administrative staff of less than ten, there shall be at least one instructional or administrative employee who has received training in emergency first aid and CPR within the last two years or who has current CPR certification. A school nurse or other qualified staff member may administer emergency aid.~~

~~All employees shall be notified as to where first aid supplies and emergency equipment is stored.~~

In school buildings with an instructional and administrative staff of ten or more, there shall be at least two employees who have current certification in cardiopulmonary resuscitation or have received training, within the last two years, in emergency first aid and cardiopulmonary resuscitation. If one or more students diagnosed as having diabetes attend such school, there shall be at least two employees who have been trained in the administration of insulin and glucagon.

In school buildings with an instructional and administrative staff of fewer than ten, there shall be at least one employee who has current certification in cardiopulmonary resuscitation or has received training, within the last two years, in emergency first aid and cardiopulmonary resuscitation. If one or more students diagnosed as having diabetes attend such school, there shall be at least one employee who has been trained in the administration of insulin and glucagon.

When a registered nurse, nurse practitioner, physician or physician assistant is present, no employee who is not a registered nurse, nurse practitioner, physician or physician assistant shall assist with the administration of insulin or administer glucagon. Prescriber authorization and parental consent shall be obtained for any employee who is not a registered nurse, nurse practitioner, physician or physician assistant to assist with the administration of insulin and administer glucagon.
