0 100 200 300 400 Meters

Notes on Data Sources:

The elevation surface used in the viewshed analysis was derived from LiDAR data flown in late 2015. This accounts for the height of buildings and vegetation at the date of acquisition.

The land cover data used to identify tree canopy is from the Virginia statewide land cover dataset created by Worldview and organized by VGIN. In Albemarle County, aerial photos from 2013 were used in the land cover classification.
