Division Teaching Staff Class and Course Data Report

At the Board's request, data were collected on all teaching positions in the Division across elementary, middle, and high school to include the periods taught, the total numbers of students taught by each teacher across periods, and the different course preparations assigned to each teaching position.

Data were verified by building level administrators in each school prior to the report being generated by the Department of Assessment, Research and Technology (DART) for the Board's consideration. All teaching positions are represented: intervention, special education, gifted, electives, elementary specialists, regular classroom, and core content.
