

CHARLOTTESVILLE CITY SCHOOLS

10-Day Enrollment Report

Prepared by Kim Powell
08/26/2026

The following tables show enrollment and class size information as of the 10th day for the 26-27 school year:

Enrollment Totals

School	Total	PK 3	PK 4	K	1	2	3	4	5	6	7	8	9	10	11	12	PG
Greenbrier Elementary	299			57	46	45	47	48	56								
Jackson-Via Elementary	357			62	49	59	70	64	53								
Summit Elementary	261			36	45	59	29	42	50								
Sunrise Elementary	337			43	60	62	65	53	54								
Tall Oaks Elementary	285			47	55	41	43	54	45								
Trailblazer Elementary	285			44	46	41	50	59	45								
CMS	817									283	258	276					
CHS	1364												350	334	357	314	9
LMA	43												7	11	12	13	
CELC	165	107	58														
Total	4213	107	58	289	301	307	304	320	303	283	258	276	357	345	369	327	9

Average Class Sizes

	K	1	2	3	4	5
Greenbrier Elementary	19	15	15	16	16	19
Jackson-Via Elementary	20	15	19	17	20	17
Summit Elementary	13	15	15	16	15	18
Sunrise Elementary	13	20	20	21	17	17

Trailblazer Elementary	15	15	21	17	20	15
Average	16	16	17	17	18	17

	Language Arts	Math	Science	History/ Civics
CMS	14	13	20	20
CHS	19	19	22	23

Birth Rates & Public School Enrollment Trends

As of January 2026, the Congressional Budget Office published the following information pertaining to Population Growth:

<https://www.cbo.gov/publication/61994>

- **Population Growth.** On the basis of recent laws, policies, and demographic trends, CBO projects that the rate of population growth will generally slow over the next 30 years, from an average of 0.3 percent a year in the next decade to an average of 0.1 percent a year from 2037 to 2056. The total population is projected to stop growing in 2056 and remain roughly the same size as in the previous year. Thereafter, the population is projected to shrink. Net immigration (the number of people who migrate to the United States minus the number who leave) is projected to become an increasingly important source of population growth in the coming years, as declining fertility rates cause the annual number of deaths to exceed the annual number of births starting in 2030. Without immigration, the population would begin to shrink in 2030.

January 2026

The Demographic Outlook: 2026 to 2056

Population Growth and Contributing Factors

The University of Virginia's Weldon Cooper Center for Public Service reports enrollment stagnation and decrease in most counties. Between 2010 and 2019, just a handful of localities increased their enrollment by 5% or more; CCS was one of them.

– Change in Public School Enrollment 2010 to 2019
Source: Virginia Department of Education Fall Student Count

CCS was immune from the declining birthrate trend until the pandemic due to a steady surge of English Language Learners and the UVA student migration to new apartment buildings on W. Main Street freeing up local housing stock for families.

CCS enrollments have been impacted by the birth rate decline coupled with immigration policy shifts since the pandemic. The birthrate decline and the housing developments planned and in-progress were factored into Woolpert's elementary rezoning recommendations.
