RE: Stanardsville Wastewater Treatment Plant Closure Project Bids

Please note that our design consultant WW Associates has finished designing the Stanardsville Wastewater Treatment Plant Closure Project, and we are ready to bid the construction contract. Once bids are submitted and we have a more accurate cost estimate, we will also be bringing forward a budget amendment as well as working with the State on closing the loan to cover design, construction and related costs.

Until then, we ask that you approve at the July 14th Board of Supervisors Meeting our initiating the construction bidding process.

Thank you for your help with this important project.
