Planning Commission, Staff and all whom it concerns,

Our clients would like to maintain the existing proffer that states the setback along Franklin St. to be 20 feet.

They would like to add a proffer allowing the porch roof to extend no further than 5 feet into the setback and located generally as indicated on the Architectural Site Plan A-003 dated 06 Feb 2026.

The porch roof overhang in question provides balance to the facade, as well as shelter over a portion of the means of egress from the front porch. The porch roof overhang extends 2'-4" further into the setback than what is currently allowed.

We are happy to answer questions about this rezoning application at any time.

Thank you,

Matthew Robertson

Statement of Proffered Conditions for the proposed single family detached home at 361 Franklin St.

In connection with the rezoning request for the property located at 361 Franklin Street and identified as tax map parcel 27-Q-1, I hereby proffer that the use and development of the subject property shall be in strict accordance with the conditions set forth in this submission.

1. More than one dwelling is prohibited.
2. The minimum setback along Franklin Street shall be 20 feet, except for the porch roof, which shall extend no further than 5 feet into the setback and shall be in the general location indicated on the Architectural Site Plan A-003 dated 06 Feb 2026.

Peak Hour Trip Generation by Land Use

Row	ITE Land Use		ITE Land Use Code	Unit	Quantity	AM Peak Hour of Adjacent Street Traffic	PM Peak Hour of Adjacent Street Traffic
1	Proposed #1	Single Family Home (Detached)	210	Dwelling Unit	1	1	1
2	Proposed #2						
3	Proposed #3						
4	Proposed #4						
5	Proposed #5						
6	Proposed #6						
7	Total New Trips						
8	Existing #1	Vacant	N/A				
9	Existing #2						
10	Existing #3						
11	Existing #4						
12	Existing #5						
13	Existing #6						
14	Total Existing Trips						
15	Final Total (Total New – Total Existing)					1	1

Instructions

Determination of trip generation rates shall be in conformance with ITE guidelines.

1. Based on the intended use(s), calculate the AM Peak and PM Peak trip generation using the AM and PM Peak Hour of Adjacent Street Traffic rates from the most current version of the ITE Trip Generation Manual (rows 1-6). Attach additional sheets as necessary for more uses.
2. Sum up all of the trips generated for the new uses in the Total New Trips row (row 7).
3. If the development has any existing uses, calculate the AM Peak and PM Peak trip generations using the AM and PM Peak Hour of Adjacent Street Traffic rates from the most current version of the ITE Trip Generation Manual (rows 8-13). Attach additional sheets as necessary for more uses.
4. Sum up all of the trips generated for the existing uses in the Total Existing Trips row (row 14).
5. Subtract the total existing trips from the total new trips to get the final total number of trips generated by the development (row 15). Enter these numbers on the first page.
