

The County is closely monitoring weather conditions in the interest of balancing safety with the public's plans to provide input at tonight's scheduled meeting of the Board of Supervisors. Please note the following:

1. Today's 4pm budget work session is cancelled. The Board will consider an agenda amendment to add a budget discussion at the regular meeting when it is held.
2. An update will be issued after 4pm regarding the Board meeting itself. The following are potential scenarios and weather will impact the final decision:
  - a. The regular meeting will be held as normal; **OR**
  - b. The regular meeting will be cancelled; **OR**
  - c. The regular meeting will be opened to preserve the advertised public hearings and public comment periods tonight, which will then become part of a rescheduled meeting tomorrow. Citizens may attend to provide input either tonight or tomorrow in this scenario. The County is considering this option in an attempt to accommodate those citizens who have made specific arrangements to attend tonight and want their feedback heard as early as possible regarding the Valley Link project.

Given potential citizen input on the Valley Link project and the budget, the County is working diligently to allow citizens as many opportunities as possible to provide timely input.
