## NOTICE OF ALLEGED VIOLATION

SUBJECT: Louisa County  
Waterworks: Six-O-Five Village  
PWSID No: 2109675

April 14, 2025

Bryon Fields, Homes of America LLC  
P.O. Box 249  
Englewood, NJ

### **Re: Failure to Notify the Virginia Department of Health Within 24 Hours**

Dear Mr. Fields

This notice is to advise that you appear to be operating a waterworks in violation of the Public Water Supplies Law, Title 32.1, Chapter 6, Article 2 of the Code of Virginia, and Section 12VAC5-590-570 B of the Virginia *Waterworks Regulations* (“Regulations”) for failing to notify the Virginia Department of Health (VDH) within 24 hours of an event requiring such notice under the Regulations. VDH has identified this as a Tier 2 violation.

Section 12VAC5-590-570 B of the Regulations states, “The owner shall report the following incidents within 24 hours to [VDH]: 1. Water pressure below the 20 psi minimum required in the distribution system, including zero or negative pressure. Examples of these events include treatment plant or pump station shutdowns due to equipment failure, power outages, emptying of storage tanks, and draining of the distribution system during fire flow events. 2. Flooding of clearwells. 3. Flooding of groundwater wells. 4. Any other situation that occurs with the waterworks that presents or may present an imminent and substantial threat to public health.”

Six-O-Five Village Well No. 1 suffered an electrical failure on March 29, 2025, leading to pressure in the distribution system falling below 20 psi. Pursuant to Section 12VAC5-590-570 B, representatives of Six-O-Five Village waterworks were required to notify the VDH-ODW of the loss of pressure and the boil water advisory that was distributed to residents of the property within 24 hours. The property management at Six-O-Five Village distributed a boil water advisory (written in English) to residents at the property in between 9:30 AM and 12:00 PM on March 29, 2025. It is of note that a large portion of residents speak Spanish and did not receive materials

delivered in Spanish, making ease of understanding limited. VDH-ODW did not receive notification of the loss of pressure or Boil Water Advisory until April 3, 2025, which is greater than 24 hours from the time of the event.

#### **Requested Actions**

Within 30 days, establish a Standard Operating Procedure (SOP) for providing notice within 24 hours to VDH-ODW for events identified in Section 12VAC5-590-540 B of the Regulations. Upon completion of the SOP, provide the SOP to VDH-ODW. Within 30 days of developing the SOP, train waterworks personnel about the SOP and notify VDH-ODW once training has been completed.

#### **Requested Actions**

Within 30 days, establish a Standard Operating Procedure (SOP) for providing notice within 24 hours to VDH's Office of Drinking Water (ODW) for events identified in Section 12VAC5-590-540 B of the Regulations. Upon completion of the SOP, provide the SOP to ODW. Within 30 days of developing the SOP, train waterworks personnel about the SOP and notify ODW once training has been completed. Failure to voluntarily take these actions may result in VDH pursuing enforcement action as described in the Enforcement Authority paragraph below.

#### **Required Actions**

In accordance with Section 12VAC5-590-540 of the Regulations, a Tier 2 violation requires you issue a Tier 2 Public Notice ("Notice") to the consumers in the area served in accordance with the public notification requirements described below:

**Public Notice:** The Tier 2 Notice requires you to notify consumers in the area served within 30 days of learning of the violation. This Notice must be handled as follows:

- You must provide a Notice to consumers no later than May 17, 2025; (i.e., 30 days from date of letter or 30 days from when owner was apprised of the violation, whichever comes first.)
- The Notice must be mailed or directly delivered to each customer receiving a bill, and to other service connections served by your waterworks.
- If your waterworks serves consumers who do not pay water bills, or who do not have service connection addresses (apartment dwellers, university students, or nursing home patients, for example), you must also use other delivery methods to provide the Notice to these consumers as well. Examples of other methods include, but are not limited to, publication in local newspapers, delivery of multiple copies to apartment buildings, or posting the Notice in public places served by the waterworks.
- *Maintain a posted public notice in place for at least seven days.*

**Draft Notice:** Attached is a draft Notice for you to distribute as directed above. You may use this Notice as is, or modify it to better meet your situation, as long as the information is accurate and

it contains all of the required elements and mandated language. If you decide to change the Notice, we suggest that you contact this Office to verify that your proposed changes meet the requirements of the Regulations. Please insert the name, address, and phone number of a waterworks representative in the spaces provided on the draft Notice.

**Public Notice Confirmation:** Within ten (10) days of completing the public notification, but no later than May 15, 2025, you must provide this Office with a copy of the Notice that you distributed, along with a signed certification that the distribution was completed in the required time and manner. Failure to distribute the Notice and submit a signed certification form to this Office may be a further violation of the Regulations. A certification form is enclosed for your use.

**Follow-Up Actions:**

Required corrective actions from a Notice of Alleged Violation on Lack of Reliability and Failure to Address Significant Deficiencies dated February 5, 2024 are **overdue** and are as follows:

- Draft and submit an emergency management plan to Richmond Field Office by May 17, 2025 (initially due June 1, 2024). The emergency management plan should include sample public notification documents for water outages and low-pressure events in both English and Spanish. In addition, contact information should be provided for providers of emergency water supplies in the event of an extended water outage. More information about emergency preparedness can be found here: <https://www.vdh.virginia.gov/drinking-water/emergency-preparedness-and-security/>
- Draft public education and awareness documents for distribution to residents regarding winter weatherization and water conservation by May 17, 2025 (initially due September 1, 2024). These documents should be in both English and Spanish and should be distributed to households prior to December 1, 2025 (initial distribution prior to December 1, 2024), and annually thereafter.

Recommended corrective actions are as follows:

- Submit plans and specifications and obtain a construction permit for the proposed well #6 on the property to ensure an additional water source for the waterworks. Richmond Field Office approved the Preliminary Engineering Report on January 21, 2025. Plans and specifications should be submitted through central plan review, more information can be found at: <https://www.vdh.virginia.gov/drinking-water/permits-and-design/>.
- Ensure property management has copies on file of boil water advisory in both English and Spanish to ensure all residents have access to public health information in times of emergency. We have enclosed a Spanish boil water template for your property for ease of use.

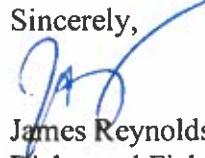

**Requesting an Administrative Proceeding:** If you disagree with the allegations in this notice or wish to obtain a determination as to whether a violation has occurred, you may request an informal conference in accordance with Va. Code § 2.2-4019 and 12VAC5-590-115 of the Regulations. To request an informal conference, please contact the ODW Director of Compliance, Enforcement and Policy by telephone or email at 804-629-0989 or [Grant.Kronenberg@vdh.virginia.gov](mailto:Grant.Kronenberg@vdh.virginia.gov).

**Enforcement Authority:** Failure to take all the necessary corrective actions in a timely manner to voluntarily return your waterworks to compliance may result in enforcement action. Enforcement actions include permit revocation, administrative orders, and civil or criminal proceedings, and

civil charges or penalties of up to \$5,000 per day for each violation. Va. Code §§ 32.1-26, 32.1-27, 32.1-175.01 and 32.1-176.

If you have any questions or concerns regarding this matter, please contact me at 757-406-1252 or email at [james.reynolds@vdh.virgnia.gov](mailto:james.reynolds@vdh.virgnia.gov)

Sincerely,

James Reynolds, PE, Field Director  
Richmond Field Office

**NOTICE TO CONSUMERS  
of the SIX-O-FIVE WATERWORKS**

**IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER**

**Failure to Notify the Virginia Department of Health Within 24 Hours**

Our water system violated drinking water requirements by not reporting a loss of water pressure below 20 psi due to well equipment failure on March 29, 2025, to the Virginia Department of Health, Office of Drinking Water within 24 hours. We notified the Office of Drinking Water on April 3, 2025. Although this situation does not require that you take immediate action, as our customers, you have a right to know what happened, what you should do, and what we did (are doing) to make sure we give timely notice to the Virginia Department of Health in the future. *A Boil Water Advisory was issued to residents on March 29, 2025, and was lifted on April 8, 2025.*

**What should I do?**

There is nothing you need to do at this time. You may continue to drink the water. The Boil Water Advisory was lifted on April 8, 2025.

**What is being done?**

Our water system is working to develop standard operating procedures to ensure that the Office of Drinking Water is notified within 24 hours when there is a loss of water pressure below 20 psi in the distribution system. The procedures will also identify other scenarios that require timely notification to the Office of Drinking Water.

For more information, please contact Matt Raynor, Operator, at (919) 270-4831 or via email at [tarmatt@aol.com](mailto:tarmatt@aol.com).

*\*Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.\**

This notice is being sent to you by Six-O-Five Village. State Water System ID#: 2109675

Date distributed: \_\_\_\_\_

SUBJECT: Louisa County  
Waterworks: Six-O-Five Village  
PWSID No: 2109675

**AVISO A LOS CONSUMIDORES  
de la PLANTA HIDRÁULICA SIX-O-FIVE**

**INFORMACIÓN IMPORTANTE SOBRE SU AGUA POTABLE**

**Falta de notificación al Departamento de Salud de Virginia dentro de las 24 horas**

Nuestro sistema de agua violó los requisitos de agua potable al no informar una pérdida de presión de agua por debajo de 20 psi debido a una falla en el equipo del pozo el 29 de marzo de 2025 al Departamento de Salud de Virginia, Oficina de Agua Potable dentro de las 24 horas. Notificamos a la Oficina de Agua Potable el 3 de abril de 2025. Aunque esta situación no requiere que usted tome medidas inmediatas, como nuestros clientes, tienen derecho a saber lo que sucedió, lo que deben hacer y lo que hicimos (estamos haciendo) para asegurarnos de notificar oportunamente al Departamento de Salud de Virginia en el futuro. El 29 de marzo de 2025 se emitió un aviso de hervir el agua a los residentes y se levantó el 8 de abril de 2025.

**¿Qué debo hacer?**

No hay nada que deba hacer en este momento. Puede seguir bebiendo el agua. El aviso de hervir el agua se levantó el 8 de abril de 2025.

**¿Qué se está haciendo?**

Nuestro sistema de agua está trabajando para desarrollar procedimientos operativos estándar para garantizar que la Oficina de Agua Potable sea notificada dentro de las 24 horas cuando haya una pérdida de presión de agua por debajo de 20 psi en el sistema de distribución. Los procedimientos también identificarán otros escenarios que requieren notificación oportuna a la Oficina de Agua Potable.

Para obtener más información, comuníquese con Matt Raynor, operador, al (919) 270-4831 o por correo electrónico al [tarmatt@aol.com](mailto:tarmatt@aol.com).

\* Comparta esta información con todas las demás personas que beben esta agua, especialmente con aquellas que pueden no haber recibido este aviso directamente (por ejemplo, personas en apartamentos, hogares de ancianos, escuelas y negocios). Puede hacerlo colocando este aviso en un lugar público o distribuyendo copias en mano o por correo.\*

## NOTICE OF ALLEGED VIOLATION

SUBJECT: LOUISA COUNTY  
Water - Six-0-Five Village  
PWSID: 2109675

February 5, 2024

Mr. Matthew Raynor, Environmental Manager  
524 Meadow Avenue Loop  
Banner Elk, North Carolina 28604

**Re: Lack of Reliability and Failure to Address Significant Deficiency**

Dear Mr. Raynor:

This notice is to advise that Six-0-Five Village waterworks appears to be operating in violation of the Public Water Supplies Law, Title 32.1, Chapter 6, Article 2 of the Code of Virginia, and 12VAC5-590-350, 12VAC5-590-360, and 12VAC5-590-421 of the *Waterworks Regulations* ("Regulations") for failure to: (1) address a significant deficiency as required, and (2) operate and maintain the subject waterworks at an appropriate level of reliability.

12VAC5-590-350.D of the Regulations states, in part, that the waterworks owner must consult with the Virginia Department of Health (VDH) "regarding the appropriate corrective action with a schedule for implementing the corrective action" within 30 days of being notified of a significant deficiency. Within 45 days of the notice of significant deficiency, "the owner shall submit to [VDH] a [corrective action plan] with a schedule that meets the requirements of 12VAC5-590-421 A."

12VAC5-590-360.A of the Regulations states, in part, "The owner shall provide and maintain conditions throughout the entirety of the waterworks in a manner that will assure a high degree of capability and reliability to comply with Part II (12VAC5-590-340 et seq.) of [the Regulations]. This requirement shall pertain to the source water, transmission, treatment, storage, and distribution system facilities and the operation thereof."

12VAC5-590-421.A.4 of the Regulations states, in part, "Within 120 days of receiving written notification of the significant deficiency from [VDH]..., the owner shall either: a. Have completed corrective actions in accordance with the [VDH] approved [corrective action plan] including [VDH] specified interim measures; or b. Be in compliance with a [VDH] approved [corrective action plan] and schedule..."

## **BACKGROUND**

VDH conducted a sanitary survey of the waterworks on November 21, 2022, and noted a significant deficiency for the 5,000-gallon ground storage tank. Specifically, the tank vent pipe discharge was noted not to be properly screened at the time of inspection. The sanitary survey report required submission of photographic documentation of no floating debris, sediment buildup, corrosion in the tank and replacement of the vent pipe discharge screen at the Six-O-Five Village waterworks. VDH provided to you a sanitary survey report dated December 1, 2022, that included the identified significant deficiency and a draft corrective action plan. No signed corrective action plan was submitted and no certification of completion of corrective actions was submitted on behalf of Six-O-Five Village waterworks. On January 30, 2024, Winston Marshall, Environmental Health Specialist, Sr., observed on a special site visit that this deficiency had not been addressed.

On November 16, 2022, the waterworks was awarded American Rescue Plan Act (ARPA) funding in the amount of \$965,000 consisting of 100% grant funds under project Six-O-Five MHP, LLC: CSFRF 40. The scope of the project includes:

- Identifying a site for a new well;
- Drilling a new well and connecting to the existing water system with storage;
- Replacing all main lines up to the meter, upgrading meters, and replacing existing storage tanks; and
- Repair/replace the well house and upgrade the chemical feeder system.

RFO issued a Well Site Approval for a new well on May 30, 2023. On January 30, 2024, Winston Marshall, Environmental Health Specialist, Sr., was told by the well driller while onsite that the new well was drilled and viable. RFO ordered well development samples on January 31, 2024, to be used for water quality sampling of the new well.

The Office of Drinking Water has not yet received plans and specifications to connect the well to the existing system or to conduct replacement and repair of existing waterworks infrastructure.

RFO issued Notices of Alleged Violation to the waterworks for failure to report bacteriological monitoring results for August 2023 in a letter dated September 27, 2023, and for failure to provide consumer notice of lead results in a letter dated January 18, 2024.

On January 26, 2024, the VDH Office of Drinking Water's Richmond Field Office (RFO) was made aware of customer complaints and reports of lack of water through sister agencies and social media. A Boil Water Advisory was issued on January 26, 2024. Significant water loss is routinely experienced at the subject waterworks due to freezing pipes in the winter. These incidents are typically due to lack of freeze-protection on piping on the service side of the connection. Similar recent incidents have been reported in January 2019 and January 2022.

## **REQUIRED ACTIONS**

The owner of a public water system is responsible for compliance with the Public Water Supplies Law and the Regulations. To return to compliance, complete the following:

### **Significant Deficiency**

- Provide a corrective action plan to RFO to address the outstanding significant deficiency by March 4, 2024.
- Complete all items identified in the VDH-approved corrective action plan as soon as possible, but no later than April 3, 2024.

Mr. Matthew Raynor

February 5, 2024

Page 3 of 3

**Reliability**

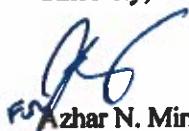

- Schedule a meeting between the waterworks owner, the Office of Drinking Water, and the owner's consulting engineer to discuss the timeline to use provided ARPA funding to address items identified in the scope of the APRA funding letter. This meeting should be scheduled to occur no later than April 1, 2024.
- Finalize the timeline for completion of ARPA projects by June 1, 2024. Provide quarterly reports of project status to RFO after June 1, 2024. The quarterly reports can be identical to those sent to satisfy ARPA funding requirements.
- Draft and submit an emergency management plan to RFO by June 1, 2024. The emergency management plan should include sample public notification documents for water outages and low pressure events in both English and Spanish. In addition, contact information should be provided for providers of emergency water supplies in the event of an extended water outage.
- Draft public education and awareness documents for distribution to residents regarding winter weatherization and water conservation by September 1, 2024. These documents should be in both English and Spanish and should be distributed to households prior to December 1, 2024 and annually thereafter.
- Construct waterworks-owned distribution lines to ensure the required minimum working pressure of 20 psi is maintained at all service connections. Take into consideration during the design of the distribution lines freeze protection, protection from physical damage, and the ability to isolate sections of lines for maintenance and repair. Construction must be completed by December 1, 2026.

**Requesting an Administrative Proceeding:** If you disagree with the allegations in this notice, or wish to obtain a determination as to whether a violation has occurred, you may request an informal conference in accordance with Va. Code § 2.2-4019 and 12VAC5-590-115 of the Regulations. To request an informal conference, please contact the ODW Director of Compliance, Enforcement and Policy by telephone or email at 804-629-0989 or grant.kronenberg@vdh.virginia.gov.

**Enforcement Authority:** Failure to take all the necessary corrective actions in a timely manner to voluntarily return your waterworks to compliance may result in enforcement action. Enforcement actions include permit revocation, administrative orders, and civil or criminal proceedings, and civil charges or penalties of up to \$5,000 per day for each violation. Va. Code §§ 32.1-26, 32.1-27, 32.1-175.01 and 32.1-176.

If you have questions regarding this matter, please contact me at (804) 664-4404 or Winston C. Marshall, Environmental Health Specialist, at (804) 489-1207.

Sincerely,

Azhar N. Mirza  
District Engineer

## OFFICE OF DRINKING WATER Richmond Field Office

Karen Shelton, MD  
State Health Commissioner

Madison Building  
109 Governor St., 6<sup>th</sup> Floor  
Richmond, VA 23219  
Phone: 804-864-7409  
Fax: 804-864-7520

January 21, 2025

SUBJECT: LOUISA COUNTY  
Water - Six-O-Five Village  
PWSID: 2109675

Mr. Bryon Fields, Our Homes of America, LLC/Six-O-Five Village  
P. O. Box 249  
Englewood, NJ 07631

Dear Mr. Fields:

A Preliminary Engineering Report prepared by Kimley-Horn for Six-O-Five Village located in Louisa County, has been reviewed by this office. The report is titled "Six O Five Villages Mobile Home Park - Water System Analysis - Preliminary Engineering Report" and is dated July 26, 2024.

The report proposes to add a new drilled well along with a storage tank, booster pumps, pressure tank, chlorination system and appropriate appurtenances to the existing water system serving Six-O-Five Village in Louisa County, Virginia.

The Virginia Department of Health, Office of Drinking Water, in accordance with 12VAC5-590-200 of the Virginia *Waterworks Regulations*, approves the Preliminary Engineering Report with the following comments:

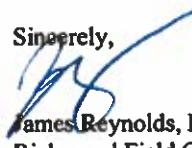

1. A well lot plat and dedication document must be submitted with the plans and specifications.

An approved copy of this document is on file in the Richmond Field Office.

The final plans and specifications must be submitted through the central plan review process, more information can be found at: <https://www.vdh.virginia.gov/drinking-water/permits-and-design/>

If we can be of additional assistance, please contact Azhar N. Mirza, District Engineer, at 804-664-4404.

Sincerely,

  
James Reynolds, PE, Engineering Field Director

# BOIL YOUR TAP WATER

**Failure to follow this advisory could result in stomach or intestinal illness.**

Date: \_\_\_\_\_

Six-O-Five Village advises all customers to boil their drinking water.

The boil water advisory is in effect until further notice.

**Description of situation that lead to boil water advisory:**

**DO NOT DRINK OR COOK WITH TAP WATER WITHOUT BOILING IT FIRST.**

Boiled or bottled water should be used for drinking, beverage, and food preparation, and making ice until further notice. Boiling kills bacteria and other organisms in the water. Boiling is the preferred method to assure that the tap water is safe to drink.

**To boil your water** - Bring all tap water to a rolling boil, let it boil for one minute, and let it cool before using, or use bottled water.

If you cannot boil your tap water an alternative method of purification for residents that do not have gas or electricity available is to use liquid household bleach to disinfect water. The bleach product should be recently purchased, free of additives and scents, and should contain a hypochlorite solution of at least 5.25%. Public health officials recommend adding 8 drops of bleach (about 1/4 teaspoon) to each gallon of water. The water should be stirred and allowed to stand for at least 30 minutes before use. Water purification tablets may also be used by following the manufacturer's instructions.

Once the Boil Water Advisory has been lifted, residents will be notified through the same methods of communication used to notify of the advisory.

**For more information, please contact:**

Trevor, Property Manager- (540) 735-6940

Matt Raynor, Operator- (919) 270-4831

For Frequently Asked Questions about boiling your tap water visit:  
[Virginia Department of Health – Office of Drinking Water FAQ website.](http://www.vdh.virginia.gov/Programs-and-Services/Drinking-Water/Drinking-Water-Frequently-Asked-Questions.aspx)

# **HIERVE EL AGUA DEL GRIFO**

**El incumplimiento de este consejo podría provocar una enfermedad estomacal o intestinal.**

Fecha: \_\_\_\_\_

Six-O-Five Village aconseja a todos los clientes que hiervan el agua potable.

El aviso de hervir el agua está vigente hasta nuevo aviso.

**Descripción de la situación que lleva a la advertencia de hervir el agua:**

## **NO BEBA NI COCINE CON AGUA DEL GRIFO SIN HERVIRLA PRIMERO.**

El agua hervida o embotellada debe usarse para beber, beber y preparar alimentos, y hacer hielo hasta nuevo aviso. Hervir mata las bacterias y otros organismos en el agua. Hervir es el método preferido para garantizar que el agua del grifo sea segura para beber.

**Para hervir el agua :** hierva toda el agua del grifo, déjela hervir durante un minuto y déjela enfriar antes de usarla, o use agua embotellada.

Si no puede hervir el agua del grifo, un método alternativo de purificación para los residentes que no tienen gas o electricidad disponibles es usar lejía líquida doméstica para desinfectar el agua. El producto blanqueador debe ser comprado recientemente, libre de aditivos y aromas, y debe contener una solución de hipoclorito de al menos 5.25%. Los funcionarios de salud pública recomiendan agregar 8 gotas de lejía (aproximadamente 1/4 de cucharadita) a cada galón de agua. El agua debe agitarse y dejarse reposar durante al menos 30 minutos antes de usarla. Las tabletas purificadoras de agua también se pueden usar siguiendo las instrucciones del fabricante.

Una vez que se haya levantado el aviso de hervir el agua, se notificará a los residentes a través de los mismos métodos de comunicación utilizados para notificar el aviso.

**Para obtener más información, póngase en contacto con:**

Trevor, Administrador de la Propiedad- (540) 735-6940

Matt Raynor, Operador- (919) 270-4831

Para preguntas frecuentes sobre cómo hervir el agua del grifo, visite:
