NET QUICK ASSETS are the highly liquid assets held by the agency, including cash, marketable securities and accounts receivable. Net quick assets (NQA) are calculated as current assets (cash + marketable securities + prepaid assets + accounts receivable) minus current liabilities of payables and deferred revenue. The target is 5 months of operating expenses (TJPDC costs minus pass-through and project contractual expenses), based on a rolling twelve-month average. The Commission has earmarked excess NQA above the target as Capital Reserves. As of the end of June 2022, the TJPDC had 8.84 months of operating expenses. The rolling twelve-month average operating expenses increased to \$104,778. The 3-month average of expenses is \$123,883. Actual operating expenses for June were \$137,823 compared to \$126,286 in May. The increased operating expenses were primarily due to budgeted one-time end of fiscal year bonuses and the purchase of necessary technology replacements and additions. Capital reserves = \$926,324 - \$523,888 = \$402,435.

UNRESTRICTED CASH ON HAND

Target = \$419,111 (4 months operating expenses)
Alarm = <\$209,555 (average oper exp 2 mos)

UNRESTRICTED CASH ON HAND

consists of funds held in checking and money market accounts immediately available to TJPDC for expenses. Cash does not include pass-through deposits in transit. Total cash minus notes payable minus deferred revenue = Unrestricted Cash on Hand.

MONTHS OF UNRESTRICTED CASH

divides unrestricted cash on hand by the agency's average

monthly operating expenses to give the number of months of operation without any additional cash received. Unrestricted cash has decreased to \$124,438 at the end of June 2022, which represents 1.19 months of operating expenses. The decrease in unrestricted cash on hand is due to larger grants requiring larger up-front outlays

as well as new grants that only permit quarterly reimbursements. Finally, it is due to several projects that require final deliverables prior to reimbursement.
